

Topower launch Ultra Small Form Factor Power Supply

With over decades of accumulated expertise, Topower has built a well-known reputation in the global IT market. To meet the needs of the rapidly evolving power segment, Topower has developed an Ultra Small Form Factor Power Supply, the TOP PC Power unit. It has been designed to answer the requirements of several application sectors, including the consumer, commercial, Gaming, and Medical Equipment which delivers an output of 100W~135W.

Turn vision into reality

You name it, we make it. Topower has designed and developed a tailored made power supply to meet with the need of the digital home and digital office environment. The company's mission is to satisfy a variety of markets.

This unique power supply allows users to embedded it into gaming computers for gambling and amusement, entertainment industry, health care terminals,

point of sale (POS) units, kiosks and digital signage systems. It is targeted for interactive clients, security surveillance systems, and industrial automation, with the mission of delivering quality and worthy products and services.

Following the mainstream in mobile technology development, Topower is devoted to power solutions for small yet powerful products in environmental friendly designs.

Designed for embedded applications

TOP PC Power provides excellent flexibility for developers of embedded applications, having been designed for neat, clean, and easy installation. Topower provides a full set of product development services from beginning to end in any project. This unique and innovative Power Supply unit

- Standard ATX Form Factor Multiple Output
- AC to DC Switching Power Supply
- Small and light User Friendly
- With ACTIVE PFC Meet EN61000-3-2
- 100-240V AC (Full-Range Input Voltage)
- Dimension: 119x74x40mm (Chassis+Fan)
- Dimension: 100x70x25mm (Open Frame Fanless)
- Meet Medical leakage current 0.5mA

was designed initially for medical use with low leakage current, compliant with medical standard (0.5mA) requirements.

Topower is devoted to produce state-of-the-art power solutions that aid users in achieving their goals.
